

Online Access to Your Clinical Equipment and Service Data

When you partner with ISS Solutions for clinical asset management, we make it a priority to keep you informed on our work and your equipment status by providing you with real-time access to information and reporting.

The ISS Client Portal allows you to easily view, filter and report on clinical device information 24/7. These features help you to monitor compliance and facilitate logical decision-making that can enhance quality, reduce operating expenses, and improve patient care.

Instant Access to Information Such As:

Online Service Requests

Inventory Data and Service Histories

Work Order Tracking and Repair Status

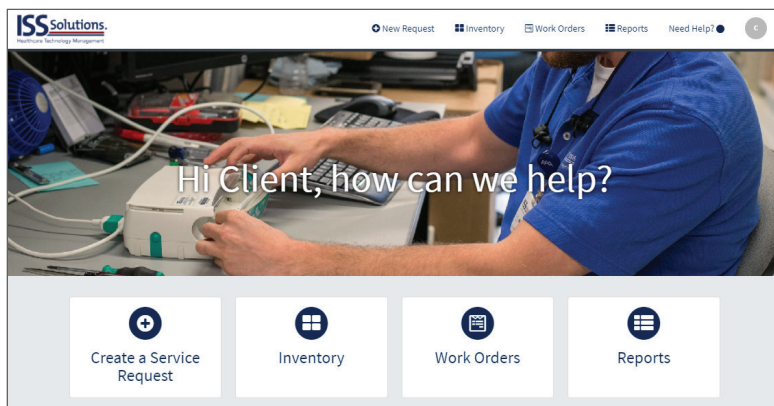

Statistical Summaries and Customizable Reports

Actionable Insights

The ISS Client Portal helps you make informed decisions with ease, by having the data you need, whenever you need it, all in one convenient place.

Our Unwavering Commitment to Excellence

We understand the importance of ensuring your delivery of exceptional patient care. Trust our team of healthcare technology management experts to deliver the on-site support and guidance necessary to get the most value from your clinical assets.
