

Clinical Inventory Management

Readily available and accurate equipment data

A complete clinical device inventory is the foundation of an effective service program and a key to ensuring financial control.

Maintaining an accurate inventory of complex and ever-changing clinical equipment is a challenging and time-consuming effort that impacts healthcare delivery. From identification, tagging and attribute recording to handling service alerts and recalls, keeping track of clinical devices in a dynamic environment is a formidable effort.

Asset Management Expertise

Let ISS Solutions solve these challenges by efficiently managing and maintaining your clinical assets, so you can focus on what you do best: delivering excellent patient care. We implement a comprehensive strategy to document, monitor and maintain your healthcare technology, regardless of ownership or service provider.

Our team of experts will ensure that your inventory meets regulatory requirements and provides you the following:

Detailed Inventory Data

Device Lifecycle Tracking

Real-Time Access 24/7

Dynamic Insights

Data-Driven Decision Making

Our robust inventory solution provides accurate reporting and visibility to detailed device information for informed decision-making, helping to:

- Improve utilization of your clinical assets
- Optimize service levels to ensure maximum functionality and financial control
- Identify surplus equipment
- Reduce equipment maintenance costs and prolong equipment life

Our Unwavering Commitment to Excellence

We understand the importance of ensuring your delivery of exceptional patient care. Trust our team of healthcare technology management experts to deliver the on-site support and guidance necessary to get the most value from your clinical assets.
